About The Voice Foundation

The world's leading organization dedicated to solving voice problems

“The human voice is our chief means of communication, a fundamental tool for working and living, and a rich source of artistic pleasure.”

- Walter Cronkite

You don't need to be an actor, singer, or broadcaster to be a professional voice user. Teachers, physicians, salespeople, and many others depend on their voices to earn a living. Warning signs of a potentially serious disease (a raspy voice, a persistent, dull pain in the throat, difficulty in swallowing, or a tired voice) are ignored too often.

According to The National Institutes of Health's National Institute on Deafness and Other Communication Disorders, approximately 7.5 million Americans have trouble using their voices. Despite widespread voice problems, too little is known about the vocal disorders which cut short careers, impair the speech process, devastate and even threaten people's lives.

The Voice Foundation is the world's leading organization dedicated to solving voice problems. The Foundation seeks to protect and enhance the gift of vocal communication through:

- Research to advance the diagnosis and treatment of vocal problems, including improved non-surgical and surgical techniques
- Sponsoring national and international symposia and seminars
- Publishing and distributing professional and scientific publications and video teaching materials
- Awarding research grants and fellowship
- Disseminating information through the media to raise awareness of voice care

Care of the Professional Voice

Attracts hundreds of medical and scientific experts, speech-language pathologists, performing artists, and teachers from over 40 states and 40 countries.

Papers presented at this Symposium educate the public and the scientific community on the latest advances in voice science and care.
